Art Unit: 2624

1. Applicant's election of species I on which claims 1-12 are readable in the reply filed on 4/30/07 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 11, 12 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 11, 12 define a **computer program** embodying functional descriptive material. However, claims 11, 12 do not define a **computer-readable medium or memory** and is thus non-statutory for that reason (i.e., "When functional descriptive material is recorded on some computer-readable medium it becomes structurally and functionally interrelated to the medium and will be statutory in most cases since use of technology permits the function of the descriptive material to be realized" – Guidelines Annex IV). The examiner suggests amending the claim to embody the program on "**computer-readable medium**" or **equivalent** in order to make the claim statutory. Any amendment to the claim should be commensurate with its corresponding disclosure.

4. Claims 1-10 are allowed.

Art Unit: 2624

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Eifrig et al (5,991,447) and Oshima et al (6,925,250) disclose an image encoding method.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuoc Tran whose telephone number is (571) 272-7399. The examiner can normally be reached on MON-FRI.
